Tanveer Najib

I am a reliable, enthusiastic and dedicated individual with the ability to adapt in any given task. I am an effective communicator who is able to organise a group in a workplace while keeping efficient in my own given task. I am a person who is always doing a job to the best of my ability, and I always aim to achieve a perfect result. I have been highly successful in meeting targets and have a driven work ethic. I am always ready to learn new skills and I have proven track records of attendance and punctuality. My previous experiences have improved my skills in computing and have given me a passion for working in a computer-based environment.

Work Experience

Software Developer @ Commit Digital
November 2022 - present
Commit Digital is a small team of software developers based in Doncaster, specialising in the Ruby on Rails framework and web development. As a developer I work very closely with clients and colleagues to ensure any techinal issues are resolved as soon as possible. I have honed my skills as a web developer, learnt the Ruby programming language, and adopted the Rails way!

Junior Software Developer @ GWD
September 2021 - March 2022
Part of the 6 month long kickstart scheme. Spearheaded the development of multiple internal projects and worked with different departments. I worked on a company statistics portal alongside upper management to ensure the best implementation.

Software Engineer @ Weightron Bilanciai
September 2020 - July 2021
Started as first-line support, eventually moving on to developing systems for clients, as well as supporting them. Learnt the in-house programming language that is used for customer systems within one month. During the 11 months I learnt more about MSSQL and how to integrate it as a backend.
